

Week 5: Overview

Overview

Weekly Objectives Description:

1. Be able to use **const** member functions and **const** objects
2. Understand the difference between when the things are assigned (using the assignment operator vs. constructed using a copy constructor).

Instructive Coverage & Activities Description:

1. In the lecture: adding comparison functions to a C++ class, **const** Member Function / **const** Objects
2. Using the assignment operator (assigning one object to another)
3. Copy Constructor (difference between initialization and assignment).

To Do List

- Review the lecture handouts and notes
